Welcome!

Thank you for coming to the State Route 37 informational Open House. Please visit the boards at your own pace. There is no formal presentation and staff are available to answer your questions.

Open House format:
1. Review the boards at your own pace.
2. Share your comments and questions with staff.
3. Provide feedback using the comment cards and turn them in at the sign-in table.

Topics:
- Process Overview
- Traffic Concerns
- Environmental Concerns
- Potential Near-Term Improvements
- Potential Mid- to Long-Term Improvements
- Potential Financing Options
- Existing and Planned Bay Trail

WE WANT TO HEAR FROM YOU

Please provide any ideas or concerns you may have about the State Route 37 Improvement Plan with us using the comment cards.

Don't forget to leave your completed comment cards with staff at the sign-in table.
Process Overview

In response to impacts from sea-level rise, flooding and increased traffic along the corridor, the counties of Marin, Napa, Sonoma and Solano, in partnership with Caltrans and the Metropolitan Transportation Commission, are planning to improve access and safety along Highway 37. In December 2015, the Transportation Authorities of Marin, Napa, Solano and Sonoma Counties formed a Policy Committee to develop an expedited funding, financing and project implementation strategy for the reconstruction of SR 37. The SR 37 Policy Committee membership includes 3 elected officials from Marin, Napa, Solano and Sonoma Counties.

**SR 37 POLICY COMMITTEE GOALS AND OBJECTIVES**

» Produce an integrated Transportation and Ecosystem Design

» Improve mobility across all modes and maintain public access

» Increase corridor resiliency to storm surges and Sea Level Rise
Traffic Concerns

The growing jobs/housing imbalance in the Bay Area is causing congestion problems throughout the region, and specifically for SR 37. The high traffic demand combined with the low capacity results in severe congestion for both weekday peak period and weekend traffic.

Prioritizing Segment B

Segment B, the two-lane segment between SR 121 (Sears Point) and Mare Island (Vallejo) was identified as a priority segment for capacity enhancement to close the gap between the two four-lane segments on either end.
Environmental Concerns

Short Term Flooding
Currently, SR 37 is protected by a complex system of interconnected levees which makes the corridor vulnerable to Sea Level Rise inundation, storm surge flooding and tidal inundation. Six low spots in the existing levee system have been identified as weak links in the system, making portions of Segments A, B and C more vulnerable to short term flooding and eventual Sea Level Rise.

Sea Level Rise
Rising sea levels due to climate change will critically impact both the study corridor and surrounding sensitive ecosystems. A majority of Segments A and B will be completely inundated during the 36” Sea Level Rise scenario, corresponding to the likely Sea Level Rise projection in 2100. Permanent inundation is expected as soon as 2050 on SR 37 between SR 121 and Sonoma Creek.

Environmental Sensitivity
SR 37 crosses the San Pablo Bay National Wildlife Refuge. The wetlands, waterways and uplands surrounding the corridor provide habitat for a wide variety of native fauna and flora, including some state and federally-protected species.
The SR 37 Policy Committee commissioned an affordability analysis to help identify the most adequate funding strategy, considering both traditional and non-traditional financing options. A trade-off analysis considering cost, availability of funding, level of control, revenue sharing potential, and timeline will determine which option is most appropriate.

The timelines associated with each financial option differ greatly and will therefore weigh significantly in the decision-making process since improvements to SR 37 are urgent.

Potential Financing Options

The recent SR 37 Affordability Analysis concluded that tolling was required to fund a replacement project.
Potential Near Term Improvements

### Location: Segment A
- **Flood Protection**: $7.5 M, 1-3 years
- **SR 37/SR121 Intersection Improvements**: $5-10 M, 1-3 years
- **Fix Settlement Issues at Railroad Crossing**: 1-2 years

### Priority Segment B
- **Metering at Mare Island Westbound On-ramp**: $4 M, 3-5 years
- **Westbound merge and lane drop improvements west of Mare Island on-ramp**: $2.5 M, 1-3 years
- **Flood protection - Raise road at Mare Island**: $5 M, 1-3 years

### Corridor
- **Park and Ride Lots**: $2 M, 1-2 years
- **Express Bus Transit Service**: TBD, 1-2 years
- **ITS Improvements - Changeable Message Signs**: $4 M, 1-2 years
Potential Mid- to Long-Term Improvements

Raised roadbed alternatives:
- Levee/embankment
- Slab Bridge/Causeway
- Box Girder Causeway
