State Route 37 Transportation and Sea Level Rise Corridor Improvement Plan

Policy Committee: November 2, 2017

With Support From:

- MT
- Caltrans
- SCTA
- Solano Transportation Authority
- STA
- Transportation Authority of Marin
- TAM
- NVTA

With Support From:

- Kimley-Horn
- AECOM
The SR 37 Corridor
Goals and Objectives

Produce an integrated transportation and ecosystem design

Improve mobility across all modes and maintain public access

Increase corridor for resiliency to storm surges and sea level rise
100 Minutes to Travel Back Home Every Day

- **6 Hours** of Congestion During Weekday AM Commute (Westbound)
- **7 Hours** of Congestion During Weekday PM Commute (Eastbound)
- **Weekend** Congestion Throughout Most of the Day
- **No Transit** Services

Segment B is the Priority Segment

Note: Risk ratings were assigned as follows: 1.0 - 1.4 (low), 1.5 - 2.4 (moderate), and a 2.5 - 3.0 (high)
Near-Term Operational Improvements at SR 121

Last minute maneuvers:
- Eastbound left lane is a trap lane
- Vehicles cut in from left-lane to right-lane

- Mandatory Stopping for Some Vehicles at Railroad Xing (buses, trucks with hazardous materials)
- Railroad Crossing Dip Causes Slow Down

Short Merge: 2-to-1 lane

- Extend 2 Eastbound Lanes East of Railroad Crossing
- SR 121 Intersection Improvements
- Increase Existing Throughput
Near-Term Operational Improvements – WB at Mare Island

- Metering Westbound on-ramp
- Improve on-ramp and lane drop merges
- Increase Existing Throughput

- Closely spaced on-ramp merge and lane drop

- Cut-through traffic from Vallejo via Mare Island

Existing

Proposed
Recommendation

• Approve the following:
  1. Support Segment B as the priority corridor segment from Mare Island Interchange to SR 121 for the Phase 2 Design Alternatives Assessment

  2. Support the following Phase 1 Near Term Project priorities for 2018 SHOPP projects:
     a. SR 37/SR 121 Intersection Improvements
     b. SR 37/Mare Island Interchange Improvements
        o Metering at Mare Island WB on-ramp
        o Westbound merge and lane drop improvements west of Mare Island on-ramp
     c. SR 37 near term flooding improvements corridor wide
Next Steps – Focus on Priority Segment B

• Develop Preliminary Design for Segment B:
  ▪ 3-Lane and 4-Lane Options
  ▪ Hybrid Roadbed Design Option: Causeway/Box Culvert/Levee
  ▪ Interchange Improvements at Mare Island and SR 121
  ▪ Bay Trail/Bike Facility options
  ▪ Refine Cost Estimates

• Near-Term Operational Improvements at SR 121 and at Mare Island

• Conduct Traffic Analysis for the Corridor

• Develop Shoreline/Flood Protection Strategies (Near-Term)

• Evaluate Transit Options for the Corridor

• Environmental Community Outreach & Public Outreach

• Complete Phase II/Design Alternative Assessment by Spring, 2018
