## A Future Highway 37 Begins with a Comprehensive Multimodal Corridor Plan

Whether you commute everyday using Highway 37 or use the roadway to view the wildlife resources, the many challenges facing Highway 37 will concern you. The Comprehensive Multimodal Corridor Plan (CMCP) is being developed in a collaborative effort between MTC, Caltrans, and the four northern Counties: Marin, Sonoma, Napa, and Solano — and they need your input. Although there are many issues facing Highway 37 sustainability — sea level rise, growing traffic needs, limited accessibility, and equity solutions in transportation options — there are also many exciting opportunities and possibilities for Highway 37. These solutions will include:

- Highway safety and congestion relief improvements
- Multimodal options including bicycle, pedestrian, and transit, as well as transit-supporting projects such as park-and-rides and bus stops
- Reconstruction to avoid flood-related closures and to meet earthquake standards
- Public Access improvements along Highway 37

This future cannot be built overnight. The CMCP will outline the short-term, medium-term, and long-term projects, strategies, and funding priorities for improvements along Highway 37. To be competitive for limited transportation funding,

the CMCP must document how the planned improvements address federal and state transportation planning objectives, including multimodal considerations, social equity, climate change, goods movement, economic development, and return on investment. To learn more about how projects can be eligible for SB-1 Solutions for Congested Corridors Program Guidelines grant funding, visit [www.catc.ca.gov/programs/sb1/Solutions](http://www.catc.ca.gov/programs/sb1/Solutions) for Congested Corridors Program (SCCP) | CTC (ca.gov). A critical element is collecting public input on the selection, prioritization, and implementation of projects within the corridor.

## It's One Corridor – Many Solutions

Your ideas will help shape these potential solutions. The Project team has developed a survey to assist in collecting information in a focused format.

Complete the Survey to Help Plan 37:
