

Background

The County Transportation Authority acts as a liaison and resource for both the jurisdictions and the Regional/State/Federal Agencies by providing project evaluation, programming and guidance to the jurisdictions and providing project delivery monitoring and information to Metropolitan Transportation Commission (MTC), Department of Transportation (Caltrans) and Federal Highway Administration (FHWA). In an on-going effort to ensure project delivery is successful for all parties, SCTA has developed a Funding Obligation History for each jurisdiction in Sonoma County that has had federal funding programmed in the past 10-15 years. To do this, SCTA staff reviewed programming from SAFETEA-LU Cycle 2, CMA Block Grant, OBAG 1 and OBAG 2 and funding reports for the federal fiscal years between 2005 and 2021 that covered STP, CMAQ, HSIP, and HBP.

Staff is requesting that the TAC review the attached histories to provide any additional details that may be missing or inaccurate prior to these histories being presented to the SCTA Board at the June Board meeting and then either quarterly, or bi-annually (depending on the preference of the Board) thereafter. Staff requests input from the TAC members NLT noon on May 28, 2021.
