

## NORTH BAY BAYLAND REGIONAL CONSERVATION INVESTMENT STRATEGY

# NORTH BAY BAYLANDS

## F A C T S H E E T

A Regional Conservation Investment Strategy (RCIS) is being developed for the San Pablo Bay (North Bay) Baylands region. Once complete and approved, the North Bay Baylands RCIS will:

- Describe existing conditions and plan for future landscape changes resulting from land conversion, climate changes, or investments in the region;
- Identify goals, objectives, priorities and actions that can be implemented to guide conservation;
- Complement existing Natural Community Conservation Plans (NCCPs), Habitat Conservation Plans (HCPs), state and federal recovery plans, or other approved conservation plans that overlap an RCIS's boundary;
- Enable the development of Mitigation Credits Agreements with CDFW. MCAs could be used to fulfill mitigation requirements for projects in advance of project impacts.
